Coverage of the presentation

- Background Information
- Objectives
- Scope
- Membership type and fees
- Secretariat and contact
- SWOT Analysis
- Past and present activities of FPSN
- Way Forward

Background Information

- Plant Protection Society Nepal (abbreviated as PPS Nepal) was founded on March 28, 2003 (As of 14th Chaitra, 2059 BS) with the goal of providing a common venue for all plant protectionists (the professionals, policy makers, researchers, academicians, technical staffs and businessmen related to this field)
- As a professional society, our main goals are to bring all plant protection stakeholders together on a single platform for productive exchanges and to contribute to the nation through various innovative activities

Plant Protection Society Nepal

December 10, 2018

E. A. Heinrichs

Secretary General

Geoff Morton

President

Background Information

- This society is not affiliated with any political, religious, racial, ethnic, regional, or ideological groups, but rather seeks to integrate all types of ideas from young and pioneering plant protection professionals in order to contribute to the betterment of the agrarian community and the nation as a whole
- In fact, this organization is dedicated to the plant protection discipline, through various activities such as seminars, workshops, conferences, discussion programs, and idea sharing meetings in relevant forums, including social media/networks.
- It publishes a Journal on a regular basis, The Journal of the Plant Protection Society Nepal by the Plant Protection Society Nepal

Objectives

- **Effective interaction** and promotion of support among scientists, technicians and entrepreneurs related with plant protection sector for the sake of the development of this sector and promotion of professionalism of the members involved in the society.
- Within the premises of Nepal, increase of awareness to the Government of Nepal and general public about usefulness of **integrated plant protection, pesticide management** and plant protection regulations, income generative activities under **industrial entomology** like Bee keeping, Silk Worm rearing, mushroom cultivation
- Establishment of **coordination and support with existing professional societies** within the country as well as extend the relationship with national and international plant protection organizations in favor of time.
- Provide the due respect to the involved members of society based on their contribution to plant protection sector development.

Objectives

- Provide **consulting services** to Government of Nepal as well as other national and international persons, organizations and institutions according to their need.
- Organize different types of **talk programmes** and social media forums on policies and technological development on plant protection, pesticide management, plant quarantine, bee keeping, mushroom cultivation and silk worm rearing.
- Provide the **environmentally safe plant protection technologies** in consent of Government of Nepal.

Scope

- The scope of this society will be focused on the subjects in **Plant Protection and industrial entomology** within the premise of the country.
- It will promote the development, conservation and promotion about research and social as well as educational service activities.
- It will provide the financial support to its members as per its strength to support to participate for study, workshop, seminar etc.

SWOT Analysis

Strength

- Plant protection sector - crosscutting and becoming more demanding
- Knowledge and awareness on plant health problems and pesticide management has raised
- Bondage of education, research, extension and private sector
- Wide scale of knowledge generation worldwide

Weakness

- Inadequate coordinated among related institutions/organizations
- Voluntary membership and optional contribution
- Low level of knowledge generation and sharing in Nepal
- Weak organizational setting
- Low level of priority

Opportunities

- Increasing need and demand of plant protection advisory services.
- National and Internal networking and cooperation
- Wider platform of knowledge sharing

Threat

- Weak resource status
- Poor quality of technical service delivery
-
