**REPORT OF NON- COMPLIANCE (PQ form 11)**  
**Internal Report**

Plants for planting are classified in ISPM 32 as a high pest risk commodity category. Different intended uses that affect the pest risk may include whether plants are grown as annuals or perennials, whether they are grown indoors or outdoors, whether they are grown in urban areas, field or nursery etc.

S.No.	Particulars	Tick (✓)	Cross (x)	Remarks
1.	Detection of quarantine pests or regulated non-quarantine pests Appropriate Level of Protection of concern to the importing country on plants in or from the place of production			
2.	Failure to undertake required laboratory tests or analyses or correctly follow procedures to identify pests			Plants should be kept in Post entry Quarantine Facility for certain period of time
3.	Import of ineligible plant taxa, plants from non-authorized origins, or plants not meeting phytosanitary import requirements			
4.	Failure to correctly list the botanical names of all the plants on documents accompanying consignments			
5.	Failure to inform the NPPO of the exporting country of any changes to management practices outlined in the place of production manual.			
6.	Failure to examine incoming or outgoing plant material			
7.	Failure to keep plants for planting that have been examined for export separate from other plant material that has not been examined			
8.	Failure to undertake ordered corrective actions within the specified time period
